The SMART Application Suite

An affordable solution for specialized needs

ecogene21

Simple

"Low code" technology that facilitates development.

Modular

Composed of numerous individual applications (Lego).

Adaptable

Easy to add functionalities as new needs arise.

Robust

Applies best practices in cybersecurity and personal information protection.

Transposable

Suitable for situations between "Excel" and commercial software solutions.

Generic Needs with Commercial Software

Standard commercial applications (e.g., SAP, etc.)

Specialized Needs with SMART

SMART

SMART was created by a non-profit organization to improve access to unmet medical needs.

Individual Needs

Excel, Word, Powerpoint

Cybersecurity and the protection of personal information are priorities in the design of SMART.

A matrix of **328** requirements from various sources was used for the design of SMART

1 Features

2 Procedures

3 Principles
